

Simplicity is the ultimate
sophistication

SOUL

Soul is a surface mount panel, vandal resistant and weather-proof in graphite colour. It is available from 1 to 4 families. The panel is made of Zamak alloy and its buttons are made of metal, what provides to the panel an IK07 rate.

The panel has a crepuscular sensor, which controls the illumination of the name tag holder and activates the Leds during a call process in low light conditions.

The panel has a wide-angle vision, thanks to its 120° built-in camera. Soul panel features a proximity reader, allowing to trigger any of the two built-in relays.

The led signalization icons, will notice the panel status, helping people wearing hearing aids.

It is possible in one installation to connect up to 2 Soul panels and to add 2 extra CCTV cameras.

ART 4”

Art 4 is the smaller video monitor in Art range with just 14 mm depth, but keeping same features as Art 7. It features a 4.3” wide screen.

The monitor is operated through soft-touch buttons and an intuitive menu, which makes it user-friendly.

The monitor has a built-in memory, which allows to store up to 20 pictures, being possible to extend this capacity or even to record videos from the missed calls by just adding a micro SD card. Auto-delete function removes the stored pictures after 30 days automatically when enabled.

Selectable intercom with other monitors inside the apartment or calls to other apartments are available, being possible to disable it in case not willing to be disturbed.

No matter where you are...

G2call **App** keeps you always connected.

1 _ User-friendly

App

AVAILABLE FOR SMARTPHONE AND TABLET

Use G2call App from any of your portable devices.

WIDE SCREEN

Do not miss any detail, maximize the screen size by swapping the image to wide screen format.

MULTIPLE SITES

Manage all sites from one App. You can add as many installations as you require.

CALL LOGS

Get a log of all calls being done and replied as well as door open process.

Easy and intuitive

2 _ Management

PROTECTED DOOR OPENING

Optionally it can be set a PIN code to activate the door open process from the App, giving an extra security in the installation.

RECORDINGS

You can reproduce the stored pictures and videos from the communications with the panel.

MONITOR SETTINGS

Change the monitor password, change to "push to talk", disable the notifications, adjust time and date, are some of the parameters that can be adjusted in the monitor.

ID SETTINGS

Define some characteristics of the installation, such as the number of door entry stations or the number of CCTV cameras connected.
